<p><b>Coastal Plotting / Navigation</b>  <b>\$945.00 / 6 days</b></p> <p><b>2012</b></p> <p>Jan 30-Feb 4        Mar 19-24        Apr 30-May 5</p>	<p><b>Terrestrial Navigation</b>  <b>\$945.00 / 6 days</b></p> <p><b>2012</b></p> <p>Feb 6-11        Mar 26-31        May 7-12        June 4-9</p> <p>This class builds upon the skills in Coastal Plotting and Navigation. <b>To do well in class you must know how to:</b>        Read and use a chart, Read latitude and longitude, Work speed, time, and distance problems, Plot a position by using bearings and distances, Plot a running fix. Plot a course        Convert courses from true to compass using variation and deviation errors        Plot a dead reckoning position        Determine set and drift of a current by plotting        If you are not familiar with the items above we strongly recommend that you attend a Coastal Plotting/Navigation course first</p>	<p><b>Celestial Navigation</b>  <b>\$1,545.00 / 11 days</b></p> <p><b>2012</b></p> <p>Mar 5-16        Apr 16-27        May 14-25        June 11-22</p> <p><b>To do well in class you need average or better math skills, along with being thoroughly familiar with basic navigation and plotting techniques.</b> If you are rusty at things like speed, time, and distance problems, plotting fixes by latitude and longitude, or adding and subtracting time, you should review the techniques before coming to class. The instructor won't have time to cover the basics that you should already know, so it may be difficult to keep up if you don't have a good foundation in the fundamentals.</p>
